TABLE 1: COMPETENCE OF LOGISTICS AND INTERNATIONAL TRADE

NO	JOB PROFILE	COMPETENCY UNIT DESCRIPTION/BASIC FUNCTIONS/DESCRIPTION	RELATED COURSE	COURSE REQUIREMENTS & COURSE CODE
1	**WAREHOUSE SUPERVISOR**	1. Manage the delivery of goods/loads/cargo	Distribution and Transportation	• Warehousing and Inventory (LO009) • Distribution and Transportation (LO025) * A- to A: Excellent * B- to B+: Good * C- to C+: Pass
		2. Use the system to manage stock	warehousing and inventory	
		3. Monitor storage facilities	warehousing and inventory	
		4. Carry out the induction process	Human Resources and Organizational Culture	
		5. Follow security procedures when handling goods/loads/cargo	Distribution and Transportation	
		6. Implement emergency-accident procedures	Health, safety and environment	
		7. Lead team/workgroup	Human Resources and Organizational Culture	
		8. Implement a quality system	Quality and risk management	
		9. Consolidate shipments	warehousing and inventory	
		10. Collect and analyze workplace data and information	Information Technology for Work Productivity	

		11. Assess and confirm customer's transportation needs	Distribution and Transportation	
		12. Participate in protecting the environment	Health, safety and environment (K3)	
2	**FREIGHT FORWARDER/ FREIGHT EXPERTS**	• Complete and check import/export documents	Freight Forwarding	• Distribution and Transportation (LO025) • Freight Forwarding (LO017) • customs (LO020)
		• Provide goods delivery information to customers	Freight Forwarding	
		• Organize vehicles for the transport of goods/loads/cargo	Distribution and Transportation	
		• Organize the international carriage of goods/loads/cargo	Freight Forwarding	
		4 Carry out customs clearance procedures	customs	
		5 Follow security procedures when handling goods/loads/cargo	Health, safety and the environment	
		6 Stock delivery	Freight Forwarding	
		7 Consolidate delivery	Freight Forwarding	
		8 Provide customer delivery services	Freight Forwarding	
		9 Gather and analyze work place data and information	Information Technology for work productivity	
		10 Assess and confirm needs transportation customer	Freight Forwarding	
3	**SUPPLY CHAIN STAFF/SUPERVISOR**	1. Provide delivery information to customers	Freight Forwarding	• Distribution and Transportation (LO025) • Freight Forwarding (LO017)
		2. Organize vehicles for the transportation of goods/loads/cargo	Freight Forwarding	

		3. Organize international freight/cargo/cargo transport	Distribution and Transportation	• Customs (LO020)
		4. Carry out customs clearance procedures	customs	
		5. Provide delivery services to customers	Freight Forwarding	
		6. Develop and maintain operational procedures for transportation and logistics companies	Freight Forwarding	
		7. Develop and evaluate strategies for transport and logistics companies	Freight Forwarding	
		8. Manage customer service	Customer relationship management	
		9. Carry out marketing planning procedures	Customer relationship management	
		10. Carry out contract management procedures	Negotiation, innovation and creativity	
		11. Implement and comply with environmental protection procedures	Health, safety and the environment	
4	**ENTREPRENEURS/ENTREPRENEURS**	1. Determine the type of product to be cultivated	Entrepreneurship	• Entrepreneurship (LO030) • Operational management and e-commerce (LO011)
		2. Plan for facilities and infrastructure needs	Entrepreneurship	
		a. Carry out the steps to obtain a business license	Entrepreneurship	
		b. Procure facilities	Entrepreneurship	
		c. Carry out labor recruitment	Entrepreneurship	
		d. Manage workforce	HR and organizational culture	
		a. Make a production plan	Operational management and e-commerce	

		b. Determine raw materials and auxiliary materials	Entrepreneurship	
		c. Procure raw materials and auxiliary materials	Entrepreneurship	
		d. Carry out the production process	Operational management and e-commerce	
		e. Manage products	Entrepreneurship	
		a. Conduct product marketing	Entrepreneurship	
		b. Build relationships with consumers	Customer relationship management	
		c. Manage finances	Business accounting	
5	**EXPORT / IMPORT STAFF**	1. Classify imported export goods according to the harmonized system (hs) code	customs	• Customs (LO020) • Freight forwarding (LO017)
		2. Access information via homepage	customs	
		3. Make a packing list	Freight forwarding	
		4. Create invoices	customs	
		5. Handle the delivery of exported goods to the port		
		6. Apply the terms and fill in the certificate of origin (ska)	Freight forwarding	
		7. Manage import custom clearance	Freight forwarding	
		8. Pay import customs levy	Customs n	
6	**EXPORT / IMPORT SUPERVISOR**	1. Classify import export goods according to hs code	customs	• Customs (LO020) • International Trade (LO014) • Procurement and management of suppliers (LO024)
		2. Determine foreign trade payment method	International trade	
		3. Apply supervision principles	Leadership and change management	
		4. Identify export commodities	customs	
		5. Do export market research	customs	
		6. Identify suppliers of imported goods	Supplier procurement and management	
		7. Calculate import costs	Customs _	

7	**PROCUREMENT SUPERVISOR/STAFF**	1. Implement a standard calculation system in the workplace	• Procurement and management of suppliers • Negotiation, innovation and creativity • Integrated Logistics System	• Procurement and management of suppliers (LO024) • Negotiation, innovation and creativity (LO030) • Integrated Logistics System (LO019)
		2. Carry out budget and financial planning		
		3. Develop, implement and review purchasing strategies	Procurement and management of suppliers	
		4. Follow contract management and negotiate contracts	Negotiation, innovation and creativity	
		5. Foster working relationships with suppliers	Procurement and management of suppliers	
		6. Handle domestic and international purchase	Supplier procurement and management	
		7. Technically prepare the purchasing process	Procurement and management of suppliers	
		8. Manage the purchasing function in the supply chain	Supplier procurement and management	
		9. Follow procedures in planning the procurement of goods/services	Supplier procurement and management	
		10. Follow the technical procedure for selecting a provider of goods/services	Supplier procurement and management	

		11. Carry out contract procedures and self-management of goods/services procurement	Procurement and management of suppliers	
		12. Carry out logistics, performance and risk procedures		
		13. Ensure working together as a team that is always effective and efficient		
		14. Ensure that procurement activity reports are submitted to related parties consistently and on time	Supplier procurement and management	
		15. Ensure work delegation to each work team runs effectively		
		16. Monitor and evaluate supplier performance	Supplier procurement and management	
		17. Manage purchases on the supply chain	Supplier procurement and management	
		18. Evaluate demand and supply related to the procurement of goods/services	Supplier procurement and management	
		19. Recommend providers of goods and services	Supplier procurement and management	
8	**PPIC-PRODUCTION PLANNING AND INVENTORY CONTROL STAFF**	1. Manage product and process design activities	Operations Management and e-commerce	• Operations Management and e-commerce (LO011) • Quality and risk management (LO021)
		2. Design logistics activities	Operations Management and e-commerce	
		3. Plan production capacity	Operations Management and e-commerce	

		4. Plan production	Operations Management and e-commerce	
		5. Control production	Operations Management and e-commerce	
		6. Check quality	Quality and risk management	
		7. Assure the quality	Quality and risk management	
		8. Plan the manufacturing workforce and evaluate the performance of the manufacturing workforce	Quality and risk management	
		9. Conduct market research and manage customer requirements	Human resources and organizational culture	
		10. Plan the cost per unit of product	Handling customer relations	
		11. Control the cost budget per unit of product	Business Accounting

INTERNSHIP CURRICULUM

NO	COMPETENCE UNITS	ACHIEVEMENTS /SCORING			
		1	*2*	*3*	*4*
I	**WAREHOUSE SUPERVISOR (DATE….S/D…..)**				
	2. Manage the delivery of goods/loads/cargo 1.1. Plan the delivery of goods/loads/cargo 1.2. Organize, store and deliver goods/loads/cargo 1.3. Complete documentation			*v*	
	2. Use the system to manage stock 2.1 Identify stock control systems used in the workplace 2.2 Use the reorder procedure to maintain stock 2.3 Manage regular stock counts and report discrepancies or discrepancies 2.4 Make reports on the function of storage records and stock functions				*v*
	3. Monitor storage facilities 3.1 Define workplace functions and operations 3.2 Monitor storage activities				
	4. Carry out the induction process 4.1 Explain the relationship between employees and the company 4.2 Explain job requirements 4.3 Complete documentation according to workplace procedures			*v*	
	5. Follow security procedures when handling goods/loads/cargo 5.1 Maintain and check the safety of goods/loads/cargo 5.2 Identify security threats or situations 5.3 Respond to security threats or situations 5.4 Maintain security records				
	6. Implement emergency-accident procedures 6.1 React to accidents 6.2 Control and assist in the accident area or emergency area 6.3 Finalize the accident-emergency process and complete records				*v*
	7. Lead team/workgroup 7.1 Coordinate team/workgroup planning 7.2 Manage and develop team/work group performance 7.3 Coordinate and facilitate team/workgroups 7.4 Document and review team/workgroup assignments				
	8. Implement a quality system 8.1 Understand the company's quality assurance development system 8.2 Use quality improvement systems, tools and techniques				
	9. Consolidate shipments 9.1 Assess the scope for consolidating freight forwarding				

	9.2 Prepare consolidation documentation				
	10. Collect and analyze workplace data and information 10.1 Identify the data/information needed 10.2 Prepare data/information to be used 10.3 Explain data/information in the workplace. 10.4 Submit data/information				
	11. Assess and confirm customer's transportation needs 11.1 Assess the goods / cargo / cargo to be sent 11.2 Determine transit needs 11.3 Complete documentation				
	12. Participate in protecting the environment 12.1 Recognize the use of existing resources 12.2 Comply with environmental protection regulations 12.3 Implement a performance improvement strategy				
2	**FREIGHT FORWARDER/ FREIGHT EXPERTS**				
	1. Complet and check import/export documents 1.1 Identify the procedure required for import /export documents 1.2 Complete documentation to fulfill regulations and necessities in the workplace 1.3 Check documentation to ensure following the submission process rulesdocument				
	2. Provide goods delivery information to customers 2.1 Agree on requests for freight forwarding services with customers 2.2 Explain the freight forwarding process				
	3. Organize vehicles for the transport of goods/loads/cargo 3.1 Plan transportation operations 3.2 Manage the transportation of goods / cargo / cargo 3.3 Complete the setup process				
	4. Organize the international carriage of goods/loads/cargo 4.1 Confirm customer needs 4.2 Arrange the transportation of goods/loads/cargo 4.3 Communicate with shipping agents and authorities				
	5. Carry out customs clearance procedures 5.1 Determine trading conditionwhich in accordance with transport 5.2 Describe regulation from the country of origin asbase claim in accordance with regulations of customs and tax 5.3 Interpret rate tax or duty tariff which applies 5.4 Determine provisions that support the industry 5.5 Apply calculation entry goods duty which applies 5.6 Determine the existence of facilities of liberation, return, or restitution tax 5.7 Interpret and apply temporary import provisions under customsand tax laws				

	5.8 Applyprocedure to solve disputes 5.9 Determine situationwhere customs excise could drop the penalty 5.10 Count the value of *freight on board* (fob), applyconversion currency which applies				
	6. Follow security procedures when handling goods/loads/cargo 6.1 Maintain and check the safety of goods/loads/cargo 6.2 Identify security threats or situations 6.3 Respond to security threats or situations 6.4 Keep security records				
	7. Deliver stock 7.1 Analyze orders to determine the necessary work steps 7.2 Follow the process of taking and preparing goods for goods to be sent. 7.3 Complete the delivery of goods according to workplace procedures and according to schedule				
	8. Consolidate delivery 8.1 Evaluate room scope for consolidating delivery goods 8.2 Preparedocumentationconsolidation				
	9. Provide customer delivery services 9.1 Handle request servicedelivery customer 9.2 Explain the process of delivering goods				
	10. Gather, analyze data and information in the workplace 10.1 Identify the data/informationrequired 10.2 prepare the data/informationthat will be used 10.3 explain data/information onthe workplace 10.4 Convey data/information				
	11. Assess and confirm needstransportation customer 11.1 Evaluate goods/load/cargo which will be sent 11.2 Determine need transit 11.3 Completedocumentation				
3	**SUPPLY CHAIN STAFF/SUPERVISOR**				
	1. Provide delivery information to customers				
	2. Organize vehicles for the transportation of goods/loads/cargo				
	3. Organize international freight/cargo/cargo transport				
	4. Carry out customs clearance procedures				
	5. Provide delivery services to customers				
	6. Develop and maintain operational procedures for transportation and logistics companies				
	7. Develop and evaluate strategies for transport and logistics companies				
	8. Manage customer service				
	9. Carry out marketing planning procedures				
	10. Carry out contract management procedures				
	11. Implement and comply with environmental protection procedures				

4	**ENTREPRENEURS/ENTREPRENEURS**				
	1. Determine the type of product to be cultivated				
	2. Plan for facilities and infrastructure needs				
	3. Carry out the steps to obtain a business license				
	4. Procure facilities				
	5. Carry out labor recruitment				
	6. Manage workforce				
	7. Make a production plan				
	8. Determine raw materials and auxiliary materials				
	9. Procure raw materials and auxiliary materials				
	10. Carry out the production process				
	11. Manage products				
	12. Conduct product marketing				
	13. Build relationships with consumers				
	14. Manage finances				
5	**EXPORT / IMPORT STAFF / SUPERVISOR**				
	1. Classify imported export goods according to the harmonized system (hs) code 1.1 Identify the goods classification system 1.2 Find item classification				
	2. Access information via homepage 2.1 Prepare computer equipment and information needed 2.2 Open the homepage 2.3 Access data/information				
	3. Make a packing list 3.1 Prepare to make a packing list 3.2 Carry out the manufacture of packing lists				
	4. Create invoices 4.1 Prepare invoice generation 4.2 Carry out invoice generation				
	5. Handle the delivery of exported goods to the port 5.1 Prepare documents and means of transportation 5.2 Monitor the movement of goods and means of transport 5.3 Manage the entry of goods				
	6. Apply the terms of the certificate of origin (ska) 6.1 Prepare documents for certificate of origin (ska) 6.2 Manage documents for certificate of origin 6.3 Receive document of certificate of origin				
	7. Manage import custom clearance 7.1 Identify import customs provisions 7.2 Identify import customs documents 7.3 Manage the letter of approval for the release of goods (sppb) 7.4 Document import customs notification documents				
	8. Pay import customs duty				

	8.1 Identify import duties (bm) and taxes in the context of imports (pdri) 8.2 Calculate the amount of bm and pdri 8.3 Deposit bm and pdri				
6	**EXPORT / IMPORT SUPERVISOR**				
	1. Classify import export goods according to hs code 1.1 Identify the goods classification system 1.2 Find item classification				
	2. Determine foreign trade payment method 2.1 Identify foreign trade payment methods 2.2 Determine the payment method				
	3. Apply supervision principles 3.1 Identify supervision implementation targets 3.2 Carry out supervision 3.3 Evaluate the implementation of supervision				
	4. Identify export commodities 4.1 Prepare export commodity identification 4.2 Identify export commodities				
	5. Do export market research 5.1 Do foreign market research 5.2 Analyze potential target market 5.3 Make export market target decisions				
	6. Identify suppliers of imported goods 6.1 Identify the need for imported goods 6.2 Carry out supplier identification				
	7. Calculate import costs 7.1 Identify the import value components 7.2 Calculate import costs				
7	**PROCUREMENT SUPERVISOR/STAFF**				
	1. Implement a standard calculation system in the workplace				
	2. Carry out budget and financial planning				
	3. Develop, implement and review purchasing strategy				
	4. Follow contract management and negotiate contract				
	5. Foster working relationships with suppliers				
	6. Handleg domestic and international purchases				
	7. Prepare the purchasing process technically				
	8. Manage the purchasing function in the supply chain				
	9. Follow procedures in planning the procurement of goods/services				
	10. Follow the technical procedure for selecting a provider of goods/services				
	11. Carry out contract procedures and self-management of goods/services procurement				
	12. Carry out logistics, performance and risk procedures				
	13. Ensure working together as a team that is always effective and efficient				
	14. Ensure that procurement activity reports are submitted to related parties consistently and on time				

	15. Ensure work delegation to each work team runs effectively				
	16. Monitor and evaluate supplier performance				
	17. Manage purchases on the supply chain				
	18. Evaluate demand and supply related to the procurement of goods/services				
	19. Recommend providers of goods and services				
8	**PPIC-PRODUCTION PLANNING AND INVENTORY CONTROL STAFF**				
	A.design products 1. Design products and processes, including product design, design product samples, conduct product trials on the production line 2. Design processes and manage product and process design activities and manage the costs of the product and process design activities 3. Manage product and process design activities B. Manage product and process design activities 1. Manage resources for product and process design activities 2. Manage the costs of product and process design activities **C.** Design logistics activities 1. Plan purchasing activities 2. Control warehousing activities				
	A.plan production capacity 1. Analyze production capacity 2. Adjust production capacity B.plan production 1. Plan material requirements 2. Develop a production schedule C. Control production 1. Control inventory (inventory) 2. Control production activities				
	A. Check quality 1. Set quality standards 2. Determine the sampling program 3. Use statistical techniques for quality control 4. Use problem-solving techniques B. assure the quality 1. Develop a quality assurance plan 2. Carry out internal audits 3. Follow up on customer complaints				
	A.plan the manufacturing workforce and evaluate the performance of the manufacturing workforce 1 Prepare a map of the manufacturing workforce organization and plan the needs of the manufacturing workforce 2 Manage the needs of the manufacturing workforce				
	A. Conduct market research and manage customer requirements 1. Define customer requirements				

	2. Manage customer complaints 3. Forecast demand 4. Plan marketing activities 5. Determine market share				
	A. Plan the cost per unit of product 1. Develop variable costs per unit of product in the production process 2. Develop fixed costs per unit of product in the production process B. Control the cost budget per unit of product 1. Prepare cost realization reports 2. Evaluate the implementation of cost realization planning for cost improvement for the production department				
ii	**TOTAL INTERNSHIP HOURS**				
iii	**EVALUATION**				

Note of the yellow highlight: no need to input

Adapted to 9 competency units

Description of the assessment with a matter of weeks

1 = 0-25

2 = 26-50

3 = 51-74

4 = 75 – 100

0.0 – 1.0 :	*moderate*	
1.1 – 2.0 :	*good*	
2.1 – 3.0 :	*very well*	
3.1 – 4.0 :	*Over Very Well/Extremely well*
